

## ELISA Plates for Rapid Contaminant Quantitation in Food & Ag Products

Our quantitative ELISA plate test kits support the need for rapid quantitative analysis of food, beverage and agricultural products for various contaminants including pesticides, herbicides, bacterial toxins, food and veterinary residues and additives, genetically modified organisms (GMOs), mycotoxins, algal toxins, industrial chemicals and surfactants.

### Key Benefits of the ELISA Plate Format

- Rapid, laboratory-based analysis
- Quantitative results
- Answers in ~3-4 hours
- Fully automated analyzers available
- Eliminates sample shipping time required for offsite analysis

# ELISA Plates for Rapid Contaminant Quantitation in Food & Ag Products

## Pesticides & Herbicides

- 2,4-D
- Alachlor
- Atrazine
- Azoxystrobin
- DDE/DDT

- Diuron
- Glyphosate
- Imidacloprid
- Clothianidin
- Metolachlor

- Organophosphates
- Carbamates
- Pyraclostrobin
- Pyrethroids
- Trifluralin

## Bacterial Toxins

- Shiga Toxin 1 (STX 1)
- Shiga Toxin 2 (STX 2)

## Food & Veterinary Residues and Additives

- Acrylamide
- Chloramphenicol
- Enrofloxacin
- Fluoroquinolones
- Gentamicin
- Histamine
- Ivermectin

- Abamectin
- Maduramicin
- Melamine
- Monensin
- Narasin
- Progesterone
- Salinomycin

- Sulfamethazine
- Sulfamethoxazole
- Trenbolone
- Nortestosterone
- Tetracycline

## GMOs – Genetically Modified Organisms (available in U.S. & LATAM only)

- CP4 EPSPS (RR)
- Cry1Ab/Cry1Ac
- Cry1F

## Mycotoxins

- Aflatoxin M1
- Ochratoxins

## Algal Toxins

- Anabaenopeptins
- Anatoxin-a
- Brevetoxin (NSP)
- BMAA
- Cylindrospermopsin
- Domoic Acid (ASP)
- Microcystins
- Nodularins

- Okadaic Acid (DSP)
- Saxitoxin (PSP)
- Lyngbyatoxin

## Industrial Chemicals

- Alkyphenols
- Benzo(a)pyrene
- Bisphenol A
- Dioxins/furans
- PBDEs
- PCBs

- Phthalates
- Triclosan

## Surfactants

- Alkyl Ethoxylate
- Linear Alkylbenzene Sulfonate
- Alkylphenol Ethoxylate

We also offer ELISA plate readers and fully automated test systems!
