

SWECO®

MX SEPARATOR

SAFER, STRONGER, CLEANER

Sweco, the world leader in separation technology, has taken vibratory separation to a new level. Introducing the latest in round separation technology, the Sweco MX™ Separator. This new generation separator has design features to increase safety, provide a stronger construction, and allow for a more sanitary process.

The totally enclosed weight guard on the MX Separator prevents “reach-in” injuries, complying with European CE Standards. The extremely rugged construction of this machine utilizes conical construction rather than flat plates which creates a more rigid geometric structure. The open base construction allows for cleaning underneath the unit, therefore preventing dirt and product build-up to occur.

Safer, Stronger, Cleaner. Since 1942 Sweco has been developing separation products to optimize your processing experience. The MX Separator. Simply one more innovation from Sweco.

**NEW GENERATION SEPARATOR THAT
INCREASES SAFETY AND IMPROVES
CLEAN-UP AND MAINTENANCE**

Safer, Stronger, Cleaner

Safer

- Totally enclosed weight guard prevents “reach-in” injuries
- Complies with European CE Standards
- Complies with ATEX Standards (with appropriate motor option)

Stronger

- More rigid geometric structure from the conical construction rather than flat plates

Cleaner

- Prevents dirt and product build-up to occur underneath the unit
- Eliminates all gussets and external crevices where product can become trapped
- Allows for total external polishing of the machine
- Allows for easier inspection and cleaning of the separator’s underside
